

Health Statistics and Reports

The Michigan Department of Community Health is responsible for the collection of information on a range of health related issues. The information is collected to monitor the general health and well-being of Michigan's citizens. These data are useful for health program development, targeting and evaluation of program progress. The information is used to identify emerging health issues and trends and can be made available for epidemiological research. Statistics are developed from the data collected to provide basic information on these health events in Michigan. The data are provided at the state, county and community level. Listed below are the categories of available statistics.
